

Recipe for configuring the WorldShare ILL request form

For libraries that don't use OCLC's WorldShare Management Services (WMS)

Ingredients	Directions
For the cookie:	
• WorldShare username & password (admin role)	1. Customize the form fields and labels. See WorldShare ILL Request Form .
• Form sections, fields, and labels	
• Library's IP range(s) for your library	2. Set your IP range. See Manage IP Addresses .
• Library's EZproxy "prefix" (if applicable)	
• Library's registry ID	3. Create an OpenURL resolver.* See Add an OpenURL resolver .
• For services other than WorldCat Discovery: admin access for configuration; documentation for OpenURL buttons	4. Provide ILL buttons in your discovery service(s). See Configure OpenURL .
For the frosting:	
• Library's brand color (hex code) and logo image URL	5. Further customize the form page. See User Interface Options and Display Settings .
• URLs for library resources	
• Custom holdings paths (copies, loans)	6. Create basic automations. See Automated Request Manager .
• Constant data (copies, loans)	

* Base URL = <https://<yourregistryid>.account.worldcat.org/account/route/wsill/openurl?>

If your library uses EZproxy, then Base URL =

<https://<yourezproxyprefix>/login?url=https://<yourregistryid>.account.worldcat.org/account/route/wsill/openurl?>

Notes
